September 13, 2020

The Pioneer Fire Protection District is in need of a 3000 gallon plus polyethylene water storage tank.

3000 gallon plus polyethylene (plastic) water storage tank for the Mount Aukum Station. The current tank is beyond repair, we have received a grant to provide a 300-gallon gas supply water pump to quickly fill fire apparatus during emergency's and fires. We could use the assistance of anyone who may have a tank that could be moved or is willing to purchase one for the Station. The Station has remained empty for years and we anticipate opening this fire station with on call volunteers before December 2020. If you can help please contact the district office Monday through Thursday 9:AM to 3:PM

Thank you

Pioneer Fire Protection District
Mark S. Matthews, Fire Chief
