UPDATE

October 30, 2020

Pioneer Fire Protection District Community

Thank you to all who have donated, committed items or funds and have contacted us with questions. We are moving forward with the water supply storage project and have updated our progress and remaining needs. In addition, we updated the amount of water we would like to store at Station 34.

Follow up on Station 34 water supply:

We have received enough funds to begin moving forward with phase I purchasing a 2500-gallon water tank for \$875.00 plus tax. We still need more funds to complete and would still like to purchase one of the 5000-gallon tanks for \$1900.00 plus tax to allow for 7500 gallons of water. This would allow to fill a water tender and one engine twice.

Needed:

5000-gallon water tank \$1900.00 plus tax

We should have about \$300.00 remaining after purchasing the 2500-gallon tank. Needing about \$1650.00 to complete the project

Follow up on the 4 corners Water Supply Storage:

The property owner has committed to provided (donated) two (2) 5000-gallon water tanks and the adjacent property owner has agreed to donated one (1) 5000-gallon water tank for a total of (3) 5000-gallon water tanks. In addition, we have negotiated from a local tank provider a \$1900.00 plus tax for the 5000-gallon tanks needed for this project.

We only need one (1) more 5000-gallon tank and then we will be able to move into phase II. Procuring the 3-inch schedule 40 or 80 pipe, fittings, and galvanized pipe. We estimate the cost of the pipe, fittings and process to be around \$1800.00 if we cannot find someone to donate the piping.

Needed

(1) 5000-gallon tank	\$1900.00 plus tax
Pipe, fittings etc.	\$1800.00
